## Nedo mEsstronic 2 with Bluetooth

Nedo **mEsstronic 2** is the new generation of digital telescopic rules for measuring clear dimensions in interior work.

The new **mEsstronic 2** features an integrated Bluetooth interface, a large illuminated display and a very robust design.

The integrated Bluetooth interface transmits measurement values directly to a smartphone, tablet or laptop. Just take a measurement and press the Bluetooth key. Your data can be saved anywhere, for example in a digital document. No special software is required for data transmission. The measurement data can be used by any app on any mobile device.

The large illuminated display of the **mEsstronic 2** is easy to read, even in unfavourable light conditions. The hold function lets you capture the measured value on the display. The value flashes to show activation of the hold function.

A two-way bubble level integrated in the display housing facilitates measurements in both the horizontal and vertical position.

The automatic shut-off prevents unnecessary discharging of the two AA batteries.

2 sizes with a maximum measuring range of up to 119" / 3m and 196" / 5m are available. A padded carrying case is included as a standard.

### Features:

- Bluetooth interface for transmitting measurement values (Bluetooth 5.2 LE)
- Simple coupling with any mobile device
- Compatible with iOS, Android and Windows
- Illuminated display
- Hold function for capturing values
- Power supply 2 x 1.5 V AA batteries
- Automatic shut-off after 3 minutes of non-use
- Operating time approx. 100 h
- Integrated bubble levels for horizontal and vertical use
- Padded carrying bag supplied as standard
